

UCO®300 Activ Shampoo Lite

Acid active concentrated (brush) shampoo

UCO®300 Activ Shampoo Lite is mainly used as a brush shampoo in automatic carwashes such as rollover units and tunnel carwashes.

After using a prewash the alkalinity on the surface of the vehicle needs to be neutralized in order to be prepared for an optimal drying result.

UCO®300 Activ Shampoo Lite maintains the brushes and keeps them clean. This will prolong the lifespan of the material and reduce downtime for separate brush cleaning.

UCO®300 can also be used as a second step in the maintenance process for manually maintaining a coating.

UCO®300 has good foam and a pleasant perfume increasing the overall customer experience.

Unique corrosion inhibitors make **UCO®300** safe to use at recommended dilutions.

Application and dosage

Its designed to use in combination with air-pressure and water to obtain optimal foam coverage.

10 to 20ml (0,1 – 0,2%) per vehicle is recommended in normal conditions. This may need to be increased, according to the desired foam quality. Rinse off with clear water.

Afterwards apply polish, wax or drying agent. Dry the car.

Manual cleaning:

0,5-2% or 1/200 to 1/50 which means 1/20 to 1/5 in a foam gun.

Storage and disposal

Store only in the original container in a cool, well-ventilated place. Keep the container closed when not in use. Dispose of safely in accordance with local/national regulations.

Safety instructions for the user

Keep out of reach of children.

Minimize the risk of eye contact.

In case of contact with eyes, rinse immediately with plenty of water. Consult a doctor if pain, blinking or redness persists.

Please consult the safety data sheet.
