

UCO[®]CARE ONE SPRAY

Description

UCO[®]CARE ONE SPRAY is the modern spray dip disinfectant for sustainable and performant milk herds.

The balanced formulation, combining only skin-friendly ingredients make UCO[®]CARE ONE SPRAY a superior skin care and even skin repair product.

UCO[®]CARE ONE SPRAY is fast and easy to apply. No mixing required.

UCO[®]CARE ONE SPRAY is making control quick and easy of treated vs non treated cows by its excellent viscosity and coloring properties.

UCO[®]CARE ONE SPRAY is killing off mastitis causing bacteria and yeasts fast and effective way.

UCO[®]CARE ONE SPRAY is the product of choice for the control of both environmental and cow related mastitis.

UCO[®]CARE ONE SPRAY is developed for using in spray systems of VMS.

Properties

Great visibility of treated teats

Its exfoliating effect stimulates the proliferation of new, soft and elastic teat skin, discouraging the viability of pathogens on the teat

Product of choice for herds with high SCC

100% Iodine-free

100% CHLOR-free (absolutely no chlorine, chlorate, chlorine dioxide, chlorhexidine....)

Approval pending for use on organic farming

Part of the UCO[®]LIFE udder hygiene solutions concept

Instructions for use

Apply **UCO®CARE ONE SPRAY** on the teats by means of spray cup or spray systems immediately after each milking. Make sure each teat is completely covered with **UCO®CARE ONE SPRAY** for at least 75% of its length. Keep the cows standing after treatment during sufficient time.

Consult with our UCO®LIFE consultant to establish the milking protocol your herd deserves.

Safety instructions and storage conditions

Consult the most recent SDS.
