

UCO[®]FOAM ONE

Description

UCO[®]FOAM ONE is the number one powerful adhesive universal foam cleaner.
UCO[®]FOAM ONE is the new standard for cleaning pig, poultry, cattle farms and all other livestock and agrarian industry facilities (storage rooms, hatcheries, horticulture...).

UCO[®]FOAM ONE is to be used when cleaning results need to meet the highest requirements:

- Faster cleaning time
- Lower water consumption
- Best cleaning performance (validated by ATP/contamination levels/....)

Properties

Best-in-class foaming.
Superior adhesion power on horizontal and vertical surfaces.
Contact time up to 60 minutes, boosting the cleaning performance.
Excelling dirt removal thanks to deep cleaning action.
Removal of wide spectrum of dirt: fat/protein/carbohydrates as in feed residues, manure and other typical soiling in animal houses.
Balancing and comprehensive economical dosing.
Part of the UCO[®]LIFE biosecurity solution concept.
Safe for use as a cleaner of non-porous food contact surfaces in food processing industry.
Meets biodegradability criteria and safety as required by EU.

Instructions for use

Pre cleaning: remove litter, loose feed residues, etc prior to application of the **UCO[®]FOAM ONE**.

Apply a 0,5-2% (cold water) **UCO[®]FOAM ONE** by means of foam gun, foam lance or equivalent equipment.

Let the **UCO[®]FOAM ONE** do the job (during 10-60 min).

Do not let dry out.

Rinse the surfaces with water (medium (20/25bar) or high-pressure washer, depending on the level of contamination and surface specs.

Leave the surfaces to dry before to apply the UCO[®]DES disinfectant.

Safety instructions and storage conditions

Consult the most recent SDS.
