

# UCO<sup>®</sup>150 Wheel Brite

*Concentrated alkaline wheel cleaner, highly degradable.*

## Definition

UCO<sup>®</sup>150 Wheel Brite is a powerful alkaline (acid free) wheel and tire cleaner to efficiently remove brake dust and other dirt.

The alkaline solution has a similar cleaning effect to acid solutions. The highly biodegradable components make UCO<sup>®</sup>150 also suitable for use in washing centers with water recycling systems.

## Application and dosage

UCO<sup>®</sup>150 Wheel Brite can be used for manual spraying and automatic dosing. Make sure EPDM seals are used in the pumps.

Dilute UCO<sup>®</sup>150 between 10 and 20 % and let it react, do not let it dry. Rinse under high pressure.

Adapt the dosage and contact time depending on the level of dirt or desired result.

## Specifications

|                |                             |
|----------------|-----------------------------|
| Physical state | Liquid                      |
| Color          | Clear, Colorless            |
| pH             | 13 (1 %)                    |
| Density        | 1.11 kg/L                   |
| Solubility     | Completely soluble in water |

## Storage & Disposal

Store in a dry, cool, and well-ventilated place (5 – 30 °C). Ensure a fire-safe environment. Do not expose to temperatures above 50 °C.

Store only in the original packaging. Do not open the packaging if not in use.

Opened packaging must be carefully sealed and stored upright to prevent leakage.

Dispose of empty packaging in accordance with local or national guidelines.

## Safety instructions

Avoid contact between acidic and alkaline products. Never mix with chlorine-containing products.

Always test the compatibility of the product on a small surface.

Contact your UCO<sup>®</sup>Group representative for a customized cleaning and disinfection plan tailored to your company's needs.

Before use, please consult the safety data sheet for this product.
