

UCO[®]640 MAX Sprint Dryer

Ceramic fast drying agent

Definition

UCO[®]640 MAX Sprint Dryer is an innovative high-quality drying agent with optimal protection properties due to the ceramic components.

UCO[®]640 ensures that the water film breaks open extremely fast, and big water beads are created due to the superhydrophobic characteristics, eliminating microbeads on the surface.

Due to the protection UCO[®]640 will provide improved visibility in the rain. No smearing will occur. The floor and tubes will stay clean which reduces carwash maintenance.

UCO[®]640 delivers excellent results in soft and hard water, high and low conductivity.

UCO[®]640 is highly degradable and can be used in all types of high-speed washing centers.

Application and dosage

UCO[®]640 MAX Sprint Dryer is mainly used in automatic carwashes.

Automatic carwashes: 5 to 12 ml/car is recommended.

Foam gun: 1/10 – 1/50

Manual sprayer: 0.2 – 0.5 %.

Specifications

Physical state Liquid

Color Blue

Storage & Disposal

Store in a dry, cool, and well-ventilated place (5 – 30 °C). Ensure a fire-safe environment. Do not expose to temperatures above 50 °C.

Store only in the original packaging. Do not open the packaging if not in use.

Opened packaging must be carefully sealed and stored upright to prevent leakage.

Dispose of empty packaging in accordance with local or national guidelines.

Safety instructions

Avoid contact between acidic and alkaline products. Never mix with chlorine-containing products.

Always test the compatibility of the product on a small surface.

Contact your UCO[®]Group representative for a customized cleaning and disinfection plan tailored to your company's needs. Before use, please consult the safety data sheet for this product.
