

UCO[®]AQUA 650

Oxidizing biofilm remover and prevention

Description

UCO[®]AQUA 650 is an oxidizing biofilm remover for drinking water systems in livestock farms.

UCO[®]AQUA 650 is a highly concentrated solution for unselective and total removal of all biofilms (inorganic and organic nature) from drinking water lines, nipples, water tanks, etc. It efficiently removes vaccine, antibiotic, vitamin, and mineral residues after treatment via drinking water.

UCO[®]AQUA 650 is the product of choice to secure safe water supply to your to high-performing animals.

UCO[®]AQUA 650 is a drinking water system cleaner and is an integral part of UCO[®]LIFE BIOSECURITY CONCEPT, which copes with microbiological challenges in the livestock industry.

Properties

Immediate effervescent reaction and visible result.

Best-in-class result (validated with multiple tools, e.g., ATP).

No smell, no color.

Flexible and quick implementation (e.g., when leaking or blocking nipples).

Perfect preparation for successful drinking water treatments (vaccination, antibiotics, minerals, vitamins...).

Safe for humans and animals.

Approval for use in organic farms pending.

Specifications

Physical state	Liquid
Color	Colorless
pH	3.5
Density	1.19 kg/L

Instructions for use

Add UCO[®]AQUA 650 at 1% (1L per 100L drinking water) by predilution or using an appropriate dosing system. (Use UCO[®]AQUA S650 at 3% when cleaning is done for the first time.)

Allow UCO[®]AQUA 650 to dissolve the biofilm up to 12H (or overnight).

Rinse the system abundantly with drinking water until the drained solution is as pure as the water.

Continuous treatment

Dose UCO[®]AQUA 650 at 0,005 - 0,02 % (or 50ml-200ml) depending on the level of contaminants.

Oxidizing biofilm remover and prevention

Storage & Disposal

Store in a dry, cool, and well-ventilated place (5–30 °C). Do not expose to temperatures exceeding 50 °C.

Store only in the original packaging. Do not open the packaging if not in use. Opened packaging must be fully sealed and stored upright to prevent leakage.

Dispose of empty packaging in accordance with local or national guidelines.

Safety Instructions

Primarily intended for professional, industrial, and agricultural use.

Avoid mixing acidic and alkaline products. Do not mix with chlorine-containing products.

Always test the product's compatibility on a small, inconspicuous area before full application.

Always consult the Safety Data Sheet for this product before use.

Consult with your UCO[®]LIFE consultant to establish the milking protocol your herd deserves.
