UCO®SAN ONE

Mild oxidizing foam cleaner

Description

UCO®SAN ONE is a slightly acid foam cleaner that combines cleaning and oxidizing properties.

UCO®SAN ONE is very effective for removal of particular soils and stains.

UCO®SAN ONE is an gentle oxidizing foam cleaner for use in farms, greenhouses, mushroom growing units, veterinary clinics… . It can be used for cleaning of floors, walls, tables, packing fillers, conveyors, and other processing equipment.

Properties

- Stain removal
- Supports the prevention of protein-film build-up
- Can be used in all types of water
- Safe for use as a cleaner of non-porous food contact surfaces in food processing industry.
- Integral part of UCO®LIFE CONCEPT that copes with general and specific biosecurity challenges.

Instructions for use

Single step cleaning :

- Pre cleaning: remove loose dirt prior to application of the UCO®SAN ONE
- Apply a 2-4% (depending on the degree of soiling) UCO®SAN ONE by means of foam gun, foam lance or equivalent foam generating system.
- Let the UCO®SAN ONE do the job (during 5-10 min) Do not let dry out.
- Rinse the surfaces with water (medium (20/25bar) or high pressure washer, depending on the level of contamination and surface specs)

Two step cleaning :

- Pre cleaning: remove litter, loose feed residues, etc prior to application of the UCO®SAN ONE.
- Apply a 0,5-2% (cold water) UCO®SAN ONE by means of foam gun, foam lance or equivalent equipment.
- Let the UCO®SAN ONE do the job (during 10-60 min). Do not let dry out.
- Rinse the surfaces with water (medium (20/25bar) or high-pressure washer, depending on the level of contamination and surface specs

Apply a 0,5-2% (depending on the degree of soiling) UCO®SAN ONE by means of foam gun, foam lance or equivalent foam generating system.

Allow contact time for UCO®SAN ONE during 10-30 min.

No need for final rinse. In case rinsing is required, make sure it is done with drinking water quality.
